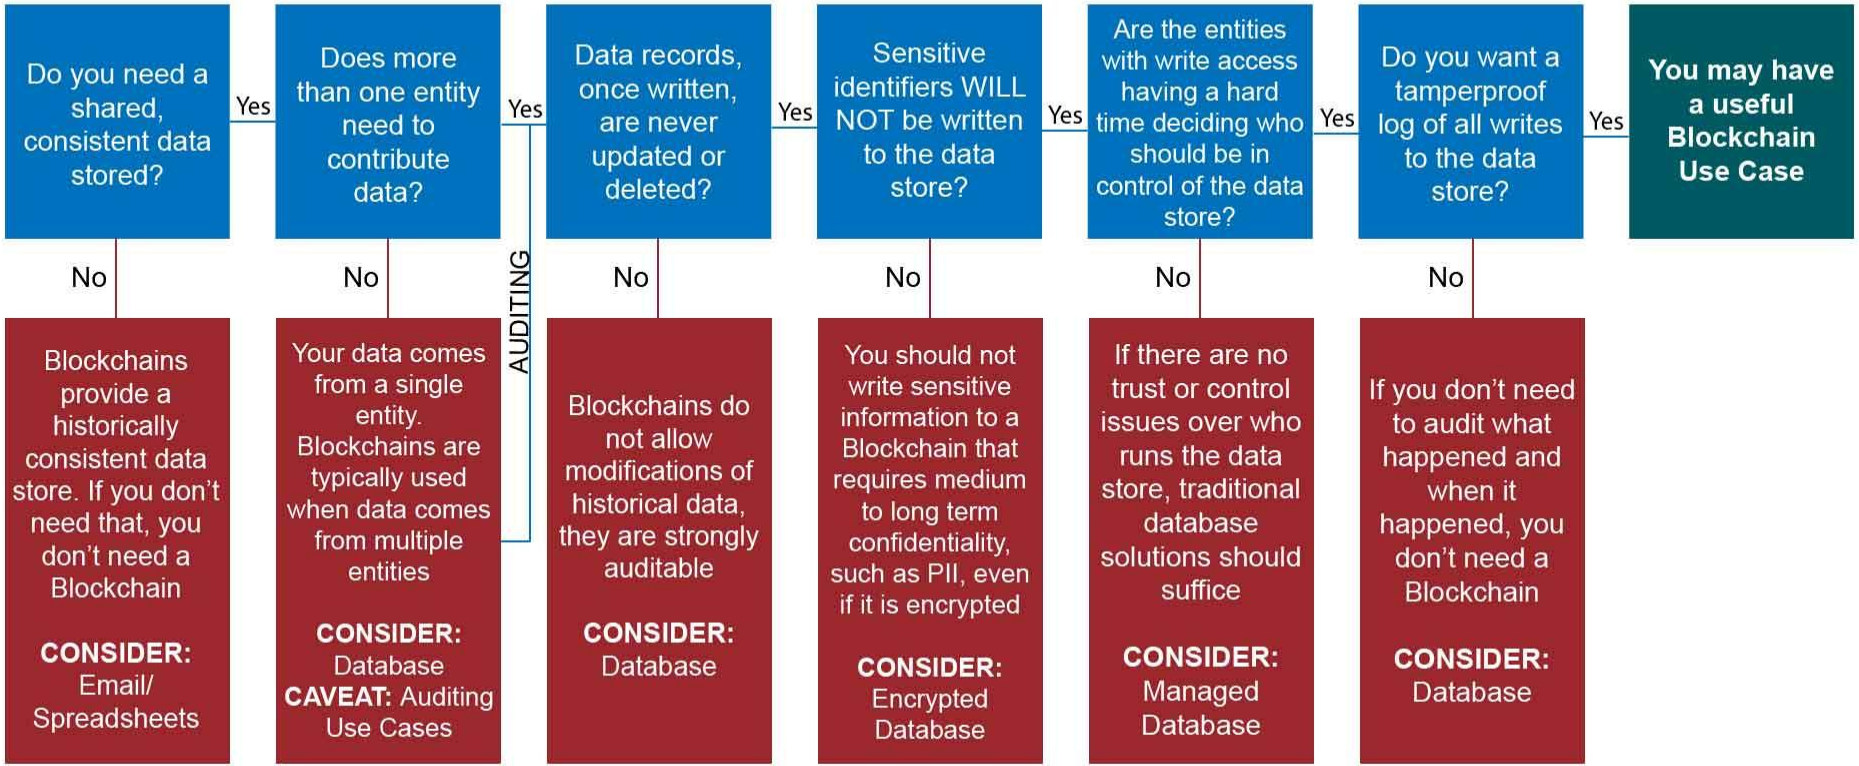
Blockchain Use Cases

When and when not to use Blockchain

Blockchain Decision Tree



Copyright © We2Blocks

When to use Blockchain

- Immutability for data
- Remove trust from intermediaries
- Transparency of data
- Transactional nature
- Prove authority
- Proof of trust through the system

Copyright © We2Blocks

When not to use Blockchain

- System functions are changing a lot
- Hardware cannot handle computation
- Applications using non-transactional nature
- Performance is a key metric
- Trust required from entities
- Data is too large
